END TO END WIFI SOLUTIONS FOR YOUR BUSINESS NEEDS

3 IN 1 WIFI GATEWAY FEATURES

1. Our 3 in 1 Gateway has 3 WAN ports. Three various ISP connections for Failover/Load Balancing help you to optimize the internet bandwidth usage and provide un-interrupted connectivity to your guest's satisfaction.

2. A unique Fire port will help you to block all the internet traffic and allow only what you need for your admin purpose (for example hotel domain ex: www. hotels.com and its emails info@hotels.com). This will enhance your PC maintenance from viruses and productivity of your staffs from misusing the internet in your premises.

3. Hotspot port will manage your WiFi services effectively through our cloud based management solution, like Time based, volume based and speed based per user. And it will take care and manage the Guest device's MAC addresses, IP addresses and user logs (URLs of the visited sites) are stored in the cloud and retrieved whenever they want as per cyber law compliance.
